To get things moving

```
public class formhelper1 {  
  
    public static void getoldNewValues(Map<id, Application_Form__c> formoldMap, List<Application_Form__c>  
        for(Application_Form__c fm : formlist){  
  
        Application_Form__c oldFormRecord = formoldMap.get(fm.id);  
        System.debug('old value : '+oldFormRecord.Student_Name__c);  
        System.debug('new values : '+fm.Student_Name__c+ 'old values : '+formoldMap.get(fm.id).Student_N  
            if(fm.Student_Name__c != formoldMap.get(fm.id).Student_Name__c){  
                // do some operation  
            }  
        }  
    }  
  
    public static void preventRecordDeletion(List<Application_Form__c> formlist){  
  
        Set<id> formIdSet = new Set<id>();  
        for(Application_Form__c fm : formlist){  
            formIdSet.add(fm.id);  
        }  
        if(formIdSet != null && formIdSet.size() > 0){  
            List<Student__c> stdlist = [select id from Student__c where Application_Form__c IN :formIdSe  
        }  
    }  
}
```

```
1 trigger ApplicationFormTrigger on Application_Form__c (before delete) {
```

```
2
3 // context variables : trigger.new, trigger.old, trigger.newMap, trigger.oldMap
4 /* object - Application_Form__c
```

```
5 trigger.new, trigger.old - list of Application_Form__c
6 trigger.new or trigger.old = list<Application_Form__c>
7 trigger.newMap, trigger.oldMap = Map<id, Application_Form__c>
```

```
8
9 when you do a before insert, you dont have trigger.old .
10 when you do after insert operation, both trigger.old and trigger.new is same.
```

```
11
12 in edit operation, your trigger.old is different then trigger.new
```

```
13
14 we will be able to get our previous values. */

## Custom Labels

## All

[Help for this Page](#)

Custom labels enable developers to create multilingual applications by presenting information (for example, help text or error messages) to users in their native language. A custom label is a custom text value that can be accessed from Apex classes, Visualforce pages, and Lightning components. If Translation Workbench is enabled for your Salesforce org, you can translate these labels into any of the languages that Salesforce supports. You can create up to 5,000 custom labels, and each label can have up to 1,000 characters.

New Custom Label			
Action	Name +	Categories	Value
<a href="#">Edit</a>   <a href="#">Del</a>	Application_Form_deletion_error_message	Application Form deletion error message	you are not allowed to delete the application form record as it has a student associated with it. Please contact your system administrator
<a href="#">Edit</a>	Created_By_Me	Created_By_Me	Created by Me
<a href="#">Edit</a>	Modal_Acknowledge_Button	Modal_Acknowledge_Button	Get Started
<a href="#">Edit</a>	Modal_Feature1	Modal_Feature1	Welcome to Dashboard P2L this utility will enable you to select which dashboard you'd like to view, sections are stored against your user and as such they are persistent.
<a href="#">Edit</a>	Modal_Feature2	Modal_Feature2	To get started with using Dashboard P2L, select the preference (pos) button on top right corner of this component. Upon clicking this button, the collapsible section with header dashboard section and sorting will be revealed to you. Private Dashboards and "Created by Me" options are always present to you, once you select the relevant order the dashboards contained within will be populated in the adjoining dropdown. After making a dashboard selection, the relevant dashboard will be displayed.
<a href="#">Edit</a>	Modal_Feature3	Modal_Feature3	In order to open records which may exist in your dashboards it is recommended that you use the middle mouse button to open these (Press mouse wheel down). Alternatively use combination of Ctrl+Cmd + Click on record which will open the relevant record in a new tab. (Note: Opening records in new windows is currently not supported)
<a href="#">Edit</a>	Modal_Feature4	Modal_Feature4	If you run into any issue such as no dashboards displaying in dropdown, contact your administrator and request access to Dashboards. To re-open this window click on the information " tooltip" icon by the header section dropdown.
<a href="#">Edit</a>	Modal_Heading	Modal_Heading	Dashboard P2L Quick Start
